

Please oppose HR 4026! The FCC made Directv and Dish Network use up valuable bandwidth to broadcast the same network feeds from local channels instead of the main network feed. I can get a newspaper delivered from anywhere in the world, but I cannot watch TV stations from anywhere but here. Where is the choice?

Now the National Association of Broadcasters wants to stop XM radio from delivering local content. Give consumers the choice!!

The FCC keeps talking about fair competition, well here is the chance!
